

Wright Ahead

Head Wrightson news

November 1976

Davy-Head Wrightson Proposed Merger

On Tuesday 23rd November 1976 it was announced that Davy International and Head Wrightson had agreed to recommend a full merger of the two companies to their employees and shareholders.

The two companies are agreed that the proposed merger will improve the market and employment prospects of HW.

There will be a period of some five weeks before the merger can come into effect and during this time there will be opportunities for full discussion within HW. John Eccles will be available to attend discussions at any HW unit with management, Divisional Councils or Trades Unions.

The international business of the two companies, their combined technical strength and skill in depth give us all the opportunity to make this merger highly successful. It will certainly be welcomed by our customers at home and abroad. The company will be seeking the full support of all who work for HW.

In order that full and vigorous discussion of all the issues involved can take place a number of meetings have already been held throughout the Group to discuss the proposed merger and more are planned.

If you have any queries why not discuss them with your supervisor or departmental head.

Ironcast beat their own record

With the completion date of the Sao Paulo tunnel segment contract only a short time away, people on the shop floor at HW (Ironcast) have been working like beavers in order to get the segments finished in time. During week commencing Monday 18 October, they in fact broke their own record by producing 243 units instead of the budgeted 200. "This was a great achievement", said Maurice Murphy, Works Manager. "We have a good team of people here at the iron foundry who were prepared to step up their production in order to meet the deadline. It is a pity that the future of the foundry does not look more promising for these people". Maurice was of course referring to there being no sign of further contracts for the iron foundry after completion of the Sao Paulo segments.

Steelcast prepare for market upturn

Part of the new semi-automatic moulding plant at HW (Steelcast) Thornaby foundry.

HW Steelcast are now well advanced in the first stage of the development scheme to improve the output and quality of castings from their three foundries and work is progressing at Thornaby and Billingham with minimum interference to current production.

New moulding equipment has already been installed at Thornaby and is currently being commissioned. This moulding unit, one of the largest of its type in the UK enables rapid and frequent pattern changes which means economic production of small numbers of castings from a succession of patterns can be achieved. Equally larger numbers of castings from a single pattern can be turned out.

New dressing equipment for final finishing has also been ordered.

At Billingham, where a new 30 ton

direct arc furnace is being installed, most of the contractors for the major parts of the installation are on site and commissioning is planned for April next year. The foundry will then be able to produce castings up to 35 tons for which there is an increasing market overseas. Other improvements including handling and heat treatment will follow, but on completion of the present phase the foundries will be better placed to take advantage of the next upturn in the economy particularly in the iron and steel, petrochemical, mining and shipbuilding industries.

Teamwork at Thornaby — Derek Hendry (front) rams the sand into one box mould while Sydney Smith operates the sand mixer.

Mach '76 success

It is not always easy to evaluate the benefits received from taking part in an exhibition especially when selling large capital plant items that require lengthy customer negotiation. Massey, however, who exhibited at the Machine Tool exhibition (MACH 76) which was held this year for the first time at the new exhibition centre in Birmingham, believe that their efforts were worthwhile and are confident these will lead back to improvements in their order book.

Their demonstration of hot forging created tremendous interest and they received a good number of enquiries from overseas countries including Spain, Greece and Turkey as well as from U.K. companies. They were also visited by fifteen of their overseas agents.

Their hot forging line was one of the highlights of the exhibition and one of the exhibits included in a film of the exhibition made by the Central Office of Information for distribution to overseas television companies.

Massey's other exhibit, one of their spark erosion machines also attracted a great deal of attention. They received a firm order for one of these machines as well as a number of interesting enquiries. Over 100 Massey employees took the opportunity to visit the exhibition centre and two coach parties made the trip to Birmingham on Saturday 25 September.

Dock-side farewell

At Middlesbrough Docks — (L-R) Eric Brown, Kalyan Datta Gupta, George Wright, Len Small.

It was pure co-incidence that Kalyan Datta Gupta, Director and General Manager of Head Wrightson India visited Cleveland HW subsidiaries at the same time as the first major shipment of gas collection equipment for the Bokaro Steelworks was due to leave Middlesbrough Docks for India.

Kalyan (his name means "peace" in India) was naturally interested to see the equipment and made a trip down to the docks with Overseas Director, Eric Brown, George Wright (Asst Manager, Steelplant) and Len Small (Project Engineer),

where he was interviewed by both the local newspaper and BBC radio station.

The shipment formed part of a £5m contract being handled by HWPEL Thornaby covering the design, supply, erection and commissioning of the suppressed combustion gas collection, cooling, cleaning and storage systems for the new BOS steelmaking furnaces being installed at Bokaro.

Having joined HW India in 1961 (when the company was heavily involved in the construction of the new Durgapur Steel plant), Kalyan became General Manager in 1968. He is now responsible for 78 staff in Calcutta offices and approx. another 67 based on jobs elsewhere in India. Kalyan tells us that although life is very busy for members of HW India, they still manage to find time to socialise and organise the occasional interdepartmental football or cricket match.

We look forward to receiving more news from our friends in India.

Eisteddfod Prize

1976 was once again the year of the Teesside International Eisteddfod and, as always, Head Wrightson sponsored one of the events — The Head Wrightson Junior Folk Dance Groups Competition. This year's winning group was from Trelaze in France and known as "Bagad Men Glaz". Ken Scott, Group Training Manager presented the Head Wrightson Trophy.

Editorial Committee to meet soon

The newly formed editorial committee for Wright Ahead, listed below, will be meeting this month to discuss present policy and consider ways to improve and widen the interest of future editions.

Mrs E Coulson, P.E.L. (T)
Mr J H Doran, HW Yarm
Mr J Hall, H.W.M.
Mr R Nicholson, H.W.T.
Mr L Robinson, Steelcast
Mr A Roxburgh, H.W.T.
Mrs C Steer, P.E.L. (L)
Mrs T Taylor, Grosvenor
Mr P Whitton, HW Yarm
Mr G Wilks, HW Yarm
Mrs T Wilson, Stampings

Representatives from the Stockholding division and Massey are yet to be nominated.

Employees who have any suggestions or items for discussion should pass these on to their committee representative.

New Look for Grosvenor

It's worth making a visit to Grosvenor Steel at Manchester just to see what changes have been made to their reception area — providing you don't get too distracted by attractive receptionist Rita Rogers!

Appointments

B & S MASSEY

A. Howard, Commercial General Manager, responsible to the Managing Director for the activities of the Sales Director, Financial Director and Commercial Manager, and their respective staffs.

A. Anthony, Company Secretary, in addition to his position as Financial Director.

K. Mason, Assistant to the Company Secretary.

WRIGHTSTOCK

G. Hunt, Director

C. W. Newton, Sales Director (Manchester)

F. Driver, Stockholding Group Sales Manager — Fasteners

K. R. Turnbull, Sales Manager — Fasteners, Worsley

M. Wynne, Sales Representative, Worsley

L. Valentine, Junior Accounts Clerk, Worsley

NESSTOCK (Glasgow Office)

B. Sutherland, Scottish Area Sales Manager

K. Kurdell, Sales Representative

D. Kelly, Scottish Area Office Manager

Mrs. M. Crawford, Clerk/Typist/Telex Operator

PARDOR ENGINEERING

G. S. Evans, Production Controller

J. White, Receptionist/Telephonist

G. Burrows, Cost Clerk.

HW & CO

D. S. Latta, Group Business Development Director (based at London office, Baltic Street)

P. Barry, Solicitor, Group Secretarial Dept., Yarm.

R & D DIVISION

K. B. Bray, Process Dept.

GROSVENOR STEEL

B. A. Maloney, Sales Engineer

HWPEL THORNABY

P. A. Scowen, Senior Sales Negotiator

R. Lappin, Engineering Dept.

HW MACHINE CO.

J. Mason, Financial Director

A Howard

K Mason

C Newton

L Valentine

B Sutherland

K Kurdell

D Kelly

M Crawford

G Evans

J White

G Burrows

P Barry

G Hunt

J Mason

Briefly...

* At the National Association of Drop Forgers and Stampers 27th Technical Convention held at the De Vere Hotel, Coventry on 15/16 October, Mr G Lyons, Assistant Engineering Manager of the R&D Division attended and presented a

paper entitled "Recent Developments in Load Monitoring on Mechanical Presses".

* Flexitime at R&D, which commenced in May with a trial run, is now fully operational.

* Watch out for the new illuminated Head Wrightson display sign at Tees-side Airport. It was installed at the end of September.

Coal stops for nobody!

Derek Kerr

No-one enjoys a challenge more than Derek Kerr of Head Wrightson Process Engineering Ltd., currently Resident Engineer at the National Coal Board's Easington Colliery which is situated a few miles from Peterlee on the north east coast.

A native of the north east, Derek has the tough job of supervising work being carried out on site by Head Wrightson and their sub-contractors since HWPEL won an order worth £1,400,000 for the design, supply, erection, testing and commissioning of an automatic skip loading and discharge plant, steel framed headgear and air casing, surface conveyors and screening plants. The order forms part of the general re-organisation taking place at Easington Colliery to deal with the planned increase in output from the mine.

With over 65 years experience in supplying and erecting surface equipment for the mining industry, there are no great problems facing the Head Wrightson team at Easington. The work so far has, however, presented quite a challenge to Derek and his team for they have had to replace the headgear at the north Downcast 1300ft. shaft while normal cage win-

ding continued. This was done by building the new headgear around the old and using the 3 week colliery holiday in July/August to put the new headgear into operation on the original centre lines. This changeover was completed in 2 weeks — quite an achievement for Derek and his men. The project was successful only because of good planning and co-operation between Derek's team and the National Coal Board. "In this case" said Derek, "it was a question of coal stopping for nobody. The headgear had to be erected while the mine was in operation and this required full co-operation from everyone on site. During the shut-down, we all pulled together to get the job finished on time."

Joining the Head Wrightson Stockton Forge in 1960, Derek's close association with the National Coal Board dates back to 1961/2 when he worked as a foreman at Westoe Colliery. Since then he's seen action at Hem Heath, Rossington, Markham Main, Silverwood, Florence, and Orden collieries as well as other Head Wrightson sites around the country. Like his father and grandfather before him (his grandfather worked on Blackpool Tower), Derek started his career at Head Wrightson as a steel erector and so knows exactly what kind of a life it is for his men — long periods away from home and family, working long hours in sometimes very harsh conditions can be hard. Bearing this in mind, Derek makes sure that the best lodgings are found for his men situated within easy reach of work and the nearest town. On site, Lawson Harnett an ex-steel erector himself, makes a good 'cuppa' and has facilities for heating up midday snacks for the men.

Having completed the first stage of the order, Derek now has to concentrate on work underground in readiness for the installation of new 10 ton capacity skips which, when fully commissioned will bring 540 tons of coal per hour to the surface.

With winter fast approaching, conditions on site might not be as good for the next stage of construction and deadlines not so easy to keep. One thing is for sure — Derek Kerr is not a man to be beaten easily. Like coal, he stops for nobody!

Lawson Harnett

Some of the men who work on the Head Wrightson site at Easington:- (L-R) David Bailey, Albert Amos, Alan Wilson, Archie Perry.

Retirement Farewells...

49 YEARS. Les Usher (left), Chief Ratefixer in the Machine Shop HW Teesdale, Thornaby, being presented with a soda syphon by Jackie Hunter, Shop Steward.

49 YEARS. Vic Beeston (left), Cost Accountant at R & D Division, receives one of his retirement gifts from Les Marshall, Commercial Manager.

45 YEARS. Freddy Goodman (left), Foreman Fitter, HW Teesdale Machine Shop, is presented with a wallet of notes by Bill Wallace, Fitting Shop Foreman.

23 YEARS. Bob Smailes (centre), Inspector, HW Teesdale, Thornaby, presented with a TV by Brian Evans, Production Director (right).

14 YEARS. Joe Sheffield, Sales Office, HW Teesdale and his wife Ruth, after Joe had been presented with a china tea service by Bob Wright, Sales Director.

28 YEARS. Ronnie Hawkins, Sales Engineer, HW Teesdale, presented with an inscribed silver tray, decanter and glasses by Bob Wright, Sales Director.

21 YEARS. Charles Balch, Cashier, HWPEL London.

47 YEARS. Les Bell, Senior Methods Engineer, HW Teesdale.

49 YEARS. Bill Murray, Planning Department, HW Teesdale.

41 YEARS. Joe Short, Shot Blaster HW (Steelcast) Thornaby.

Looking ahead

Stewart Withers

Stewart Withers, sales trainee at HWPEL Thornaby is well on the way to becoming part of the company's bright future in the fields of mining and coal preparation. After an initial general training period in most of the departments at HWPEL, — proposals drawing office, procurement, projects — he started his specialist training in Coal Preparation, Mineral Processing and mining this year under the watchful eye of Dave Smith, Senior Sales Negotiator, who is responsible for mining and coal preparation sales in the UK.

As part of his training programme, Stewart was seconded on a five week visit to the NCB South Notts. headquarters where he was directly under the supervision of Mr R Mason, the Area Coal Preparation Engineer. During this period he was involved in the day to day operation of the Cotgrave and Babbington coal preparation plants. Stewart took time off to pay two visits underground and was also able to examine a skip winding installation at Cotgrave colliery.

The NCB visit was a reciprocal arrangement following the secondment of one of the NCB engineering trainees at HWPEL last year and Stewart was impressed by the help and co-operation given him by NCB staff.

Although he does not have any engineering qualifications (he graduated with a degree in Business Studies) Stewart is keen, enthusiastic, intelligent and enjoys the work he is doing, and to further his knowledge of the engineering side of coal preparation he is attending part time, a 1 year City and Guilds Home Study course run by NCB at Whitburn.

A great lover of popular music, Stewart takes great pride in his collection of records which, when finances permit, he intends to increase. He has also a keen interest in most sports, especially tennis and football, both as a spectator and a player.

*A Merry
Christmas to
all our
readers*

CONGRATULATIONS

The following trainees have reached the required standard in their training:-

HW Teesdale (M'bro)
R W Allison, Mechanical Maintenance Part 1
HW Teesdale (Thornaby)
C E Clarke, H3 Fitting (Part 1)
S O'Hara, H3 Fitting (Part 1)
G R Smith, D1 Thick Plate Working (Part 1)
P G Tate, D1 Thick Plate Working (Part 1)
P Rutherford, D1 Thick Plate Working (Part 1)
HW (Steelcast) Billingham
A G Norris, Electrical Maintenance (Part 1)
HW (Steelcast) Thornaby
M Dawson, J2 Electrical Maintenance (Part 1)
S Ewbank, J1 Mechanical Maintenance (Part 1)

AN APOLOGY

In the August 1976 issue of W/A (Retirements) an error was made concerning the total number of years service for Mr. E. W. Haggerstone, Moulder at HW (Steelcast) Billingham. Mr. Haggerstone had been with the company for 44 years, not 19 as stated.

Weddings

JOAN SPENCE, Private Secretary/Personal Assistant to Mr P F Pugh, Works Director at HW Stampings who married Trevor Hardy on 21/8/76. Joan who has now left the company to become a full time housewife, was presented with a set of kitchen furniture by Management and Staff and a set of sherry glasses by members of the Divisional Council.

JACKIE HADDOCK, Telephonist at HW & Co Ltd London Office, who married Alan Nicholson on 9 October. Jackie has left the company after 15 years service.

MARGARET KEOGH, Secretary to Commercial Manager at R & D Division, who married John Beevers on 11 September at St James Church, Hardwick, Stockton. John is a fitter and turner at HW Teesdale.

Woodcarver extraordinaire

Norman Barrett

CHRISTINE CALVERT, Secretary to Mr M G Hipkins, Group Chief Metallurgist at R & D Division, who married Andrew Hutchinson on 14 August at St John the Baptist Church, Egglecliffe.

JANET LUNN, Clerk in the Commercial Dept. at B & S Massey, who married John Koziaryn on 18 September. John works in the Commercial Dept. as an estimator.

LINDA TULIP, Systems Analyst in the Computer Dept. at HW & Co, Yarm, who married Philip Ivison on 11 September at Hartburn Methodist Church, Hartburn, Stockton.

"Woodcarver extraordinaire" — these were the words describing Norman Barrett of B & S Massey in an article published in the Oldham Evening Chronicle on 24 August this year. Hearing of Norman's spare time talents as a woodcarver, the local paper sent a reporter to his home to interview him and photograph him with some of his carvings — crocodiles, monkeys, masks, human hands and many other exotic and marvellous creations. Norman, an assistant fitting shop foreman, first got interested in woodcarving 15 years ago when he was promoted from his job as fitter to his present position. Finding that he missed not using his hands to the same extent as before and prompted by an exhibition of rather poor quality African ritual masks in plastic, he decided to see if he could do any better and set about carving.

He hasn't looked back since and now his house is full of beautiful carvings which, because of his natural modesty, have never been exhibited outside the home. From the photo above, however, readers will get a glimpse of some of Norman's work — and won't be disappointed.

Foundry success

Another bright young man intent upon increasing his already fairly wide knowledge of Metallurgy is Tony Phillips, Shift Melting Superintendent at HW (Iron-cast) who has successfully completed his Advanced Diploma in Metallurgy at Teesside Polytechnic.

Tony, who began his career with Head Wrightson in the Training Centre, Thornaby, came to the foundry seven years ago as a trainee metallurgist and since then has achieved both the Ordinary National and Higher National Diploma in Metallurgy, The Advanced Diploma qualification exempts Tony from part of the graduation of the Institute of Metallurgy.

Long Service Awards

25 Year service presentation to Eric Evans of Grosvenor Steel (L-R) G Foote, J Lloyd, E Pratt, R J Wetton, E Evans, J Lowe, A Bennett and C Dillon.

25 Year Service Presentations have been made to:

Mr. P. Etchells, Smithy, B & S Massey

Mr. J. Williams, Stores, B & S Massey

Mr. E. Evans, Fabrication Fitter, Grosvenor Steel.

**NEXT WRIGHT AHEAD
DUE JAN. 1977.**

**CONTRIBUTIONS BY END
OF DECEMBER PLEASE.**

SOCIAL SCENE

With winter well on its way it is good to look back over the summer and remember some of the social events that were enjoyed.

Always active, the HWPEL SOCIAL COMMITTEE at Thornaby had a "sporting" evening at The Friarage, Yarm in July and, in spite of sudden rain made the most of the out-door facilities.

Archery under the guidance of Frank Holiday — (many thanks Frank!) — lawn Darts, Putting, Croquet, Bowls and Badminton were all great fun and a splendid Buffet/bar (thanks also to George Wilks) rounded the evening off nicely.

A six mile ramble on 27 June (they're a fresh air lot aren't they?) included a climb up to the well known Cleveland landmark — Roseberry Topping.

Having at last set up their own social section HW & Co's first two events, a Treasure Hunt in July and a Barbecue in September went down rather well. The torrential downpour on the night of the Barbecue did not dampen the spirits of cooks, George Watson, Mick Raby and Damaris Perry and although activities had to be transferred to the shelter of the training centre, the atmosphere and general "bonhomie" was not lost.

Winners of the booby prize at the HW & Co Social Club Treasure Hunt: (Back L-R) Sheila Watson, Margaret Thew, Alan Dawson, Anne Dawson, Fred Gamble, Brenda Gamble. (Front L-R) George Watson, Jacky Thew.

A bit on the quiet side these days, HW MACHINE CO. Staff & Benevolent & Social Fund report having made arrangements for their Annual Dinner/Dance on Friday 10 December at The Swan Hotel, Billingham. Full details and tickets priced £3.50 can be obtained from Ken Richardson, Ext. 223.

HW & Co Social Club Barbecue (L-R) Thelma Raby, Mabel Brady and John Brady.

Social Scene cont.

The HW SOCIAL CLUB at Thornaby is always busy with various functions being held in the main room or, for more intimate occasions, the lounge at "the back". The Annual Garden Produce and Handicrafts Show took place in the Club on Saturday 28 August and again, Mr F Addison almost swept the board when he won 13 firsts in the veg section.

Organiser of the "Bill Whittle" Angling competition, Harold Ebberell (Inspection Department, Machine Shop) presents the trophy to Stephen Maher.

Organised by B & S MASSEY'S SOCIAL CLUB, the "Bill Whittle" Angling Trophy held on 2 August in the Stockport Angling Society's fishing reach was won by draughtsman, Stephen Maher.

PARDOR ENGINEERING had a Darts and Doms knock-out competition on Thursday evening, 7 October which was very enjoyable for all the participants. Close games were contested with some of the favourites falling by the wayside in the early rounds. Results were as follows:-
Darts Winner — Martin Lucas
Runner-up — Brian Davies
Doms Winner — Brian Davies
Runner-up — Eric Ashmore

Pardor are now challenging any other Head Wrightson company to a similar competition. Any offers? If so, Jim Loosley is the person to contact: 021-557-2115.

Brian Davis, winner of the Domino knock-out competition (right) with runner-up, Eric Ashmore and Brian Stevens of the Express and Star newspaper.

These keen young gymnasts were being taken through their paces by the Works Manager of Stockton Steel Foundry, Peter Crawford, whose spare time is mainly taken up with coaching gymnastics at Billingham Forum.

The occasion was a friendly competition held at The Forum between young gymnasts from Cleveland in the UK and from Trauueut in Germany.

Peter and his wife, Leslie, together with other coaches in the area, organised displays and training sessions for a week and arranged accommodation for 20 German competitors and their families.

This was a reciprocal visit by the Germans following a successful trip to Trauueut last year by the English teams during a gymnastic tour. Incidentally, Peter was at one time the British Champion.

Inter-company sports

B & S Massey and Grosvenor Steel "got together" on 3 September for a Cricket/bowls competition at a local sports ground and afterwards utilised the Social Club to celebrate their victories. Massey "took" the cricket trophy and Grosvenor "won" the bowls competition.

Henry Heppenstall, captain of the winning Grosvenor bowls team holds high his trophy.

SPORTS PARADE

1976 Prize Presentations

As winners of both the cricket and football finals, HW Stampings swept up the greatest share of trophies presented by Works Director, Mr Bill Hutchinson at the Prize Presentation evening on 23 September. Head Wrightson Teesdale (M'bro Works) didn't do so bad either — they were runners-up for the cricket, football and three-rink bowls finals and winners of the single-rink bowls!

Bridge Yard at HW Teesdale won the three-rink bowls and runners-up

of the single-rink were HWPEL Thornaby. Mention must be made of the HW Cricket team, captained by Geoff Bell, who were this year's winners of the Cleveland and Teesside Cricket Association Challenge Cup — a magnificent trophy.

As in other year's, the prize evening itself was well organised by the HW Social Club Committee and the photographs show that a good time was had by all!

Winners of the cricket final: (Back L-R) Phil Ross, Mel Wild, Alan Lippeatt, Ralph Pearce, Mike Colledge, Mike McKinley. (Front L-R) Bob Walters, John Tubby, Keith Fisher, Norman Pratt, Don Briggs.

Don Briggs, commercial trainee at HW Stampings reports:-

"In the final of the inter-departmental cricket challenge cup, HW Stampings defeated HW Teesdale M'bro works in an exciting game.

Stampings batted first and made 110, mainly due to good performances from Phil Ross, John Tubby and Mick McKinley. HW Teesdale's innings began disastrously with both Phil Ross and Alan Lippiatt picking up quick wickets. Then staged a gallant fight back but a combination of deteriorating light, fine fielding and a remarkable spell of bowling from Keith Fisher in which he took five valuable wickets, proved to be too much for them. When their last recognised batsman fell to a tremendous one handed catch from Mick Colledge, all was lost and they were eventually all out for a sporting 87.

Geoff Bell, who captained the HW Cricket team — winners of the Cleveland and Teesside Cricket Association Challenge Cup.

Some of the organisers of the prize presentation social evening — (left to right) Sam Ferguson, George Wilks, Bill Hutchinson (who presented the prizes) and Jackie Hunter.

Runners-up of the cricket final (Back L-R): W Nicholson, G Fallaize, T Cardwell, D Nicholson, D Duffy, S Thompson, M Hardwick, E Surtees. (Front L-R): F White, J Joyce, C Goodhall, L Green, R Fryer, A Fryer.

Winners of the single rink bowls from HW Teesdale, M'bro works (Back L-R) W Nicholson, G Fallaize, (Front L-R) J Burton, J Hare, R Fryer.

Celebrating with a pint of the best — (Left) Stephen Beha and Tony Boylan both from HW Stampings.

Captain of the HW Stampings football team, Eddy Brown, receives the trophy from Bill Hutchinson, Works Director.

Winners of the three rink bowls from HW Teesdale Bridge Yard (Back L-R) R. Brown, H. Wardle, L. Hope (Front L-R) J. Hall, G. Mason, R. Oliver.

Captain of the runner-up single-rink bowls team receives a trophy from Bill Hutchinson.

Inter-team friendship! (left) Freddy Burton, HW Stampings and S. Thompson, HW Teesdale.

Captain of the winning three-rink bowls teams, Joe Hall and his wife Violet.
